

# Nuotrax

## THE CONNECTED HANDLEBAR ■

*Nuotrax enables to track a bike, to collect data and to control remotely electric bikes through our applications. This 2-in-1 IoT device has been thought with different designs to better fit electric bikes curves and to be easily integrated.*

### **Track and trace**

Accuracy 1 to 10 m

### **Integrated alarm**

Up to 102 dBA

### **Data collection and business analysis**

### **Remote control of the bikes**

### **Web and mobile apps for end-users**

### **Compatibility**

City and townie handlebars  
Other models on demand  
Input voltage: 12 to 48 V  
Adaptation on request

### **Connectivity**

GSM (2G) - M2M SIM  
Global coverage, multi-operator  
GPS/GALILEO/WAAS  
CAN Bus protocol

### **Battery**

Up to 30 days of backup battery
